## **DETAILED ACTION**

### ***Allowable Subject Matter***

This office action is in response to Applicants' response filed 22 September 2003. During a telephone communication with Attorney Wei-Ning Yang, on 03 December 2003, claims 1-13, 31-49 and 65-74 were canceled. Claims 14-30 and 50-64 are allowable.

1. The following is an examiner's statement of reasons for allowance: The instant application is neither anticipated by nor obvious over the prior art for the claimed stabilized vancomycin conjugate and formulation thereof. Cheng *et al.* (US Patent No. 5,627,080) teaches an immunoassay comprising use of a complex comprising a soluble bidentate reagent with a biotin member, anti-target analyte, and a biotin binding agent on a solid support, wherein the complex binds to haptenic analytes, i.e., vancomycin, for assay detection purposes. However, Cheng *et al.* does not teach the limitation of a stabilizing agent for the conjugate.

In claim 50, the use of the phrase "neutral pH" is interpreted to be that pH level defined in the specification at page 17 to be the range of pH 7-8.0.

In claim 55, the use of the phrase "lower molecular weight amine" is interpreted to be that genus described on pages 21-22 of the specification.

For these reasons the instant application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
